

ISA100 WCI Webinar

Webinar date: 2. September 2020

How can we use ISA100 in safety and process applications with regulations written for wired

Presenter:

Dräger

Ådne Baer-Olsen

Adne.Olsen@draeger.com

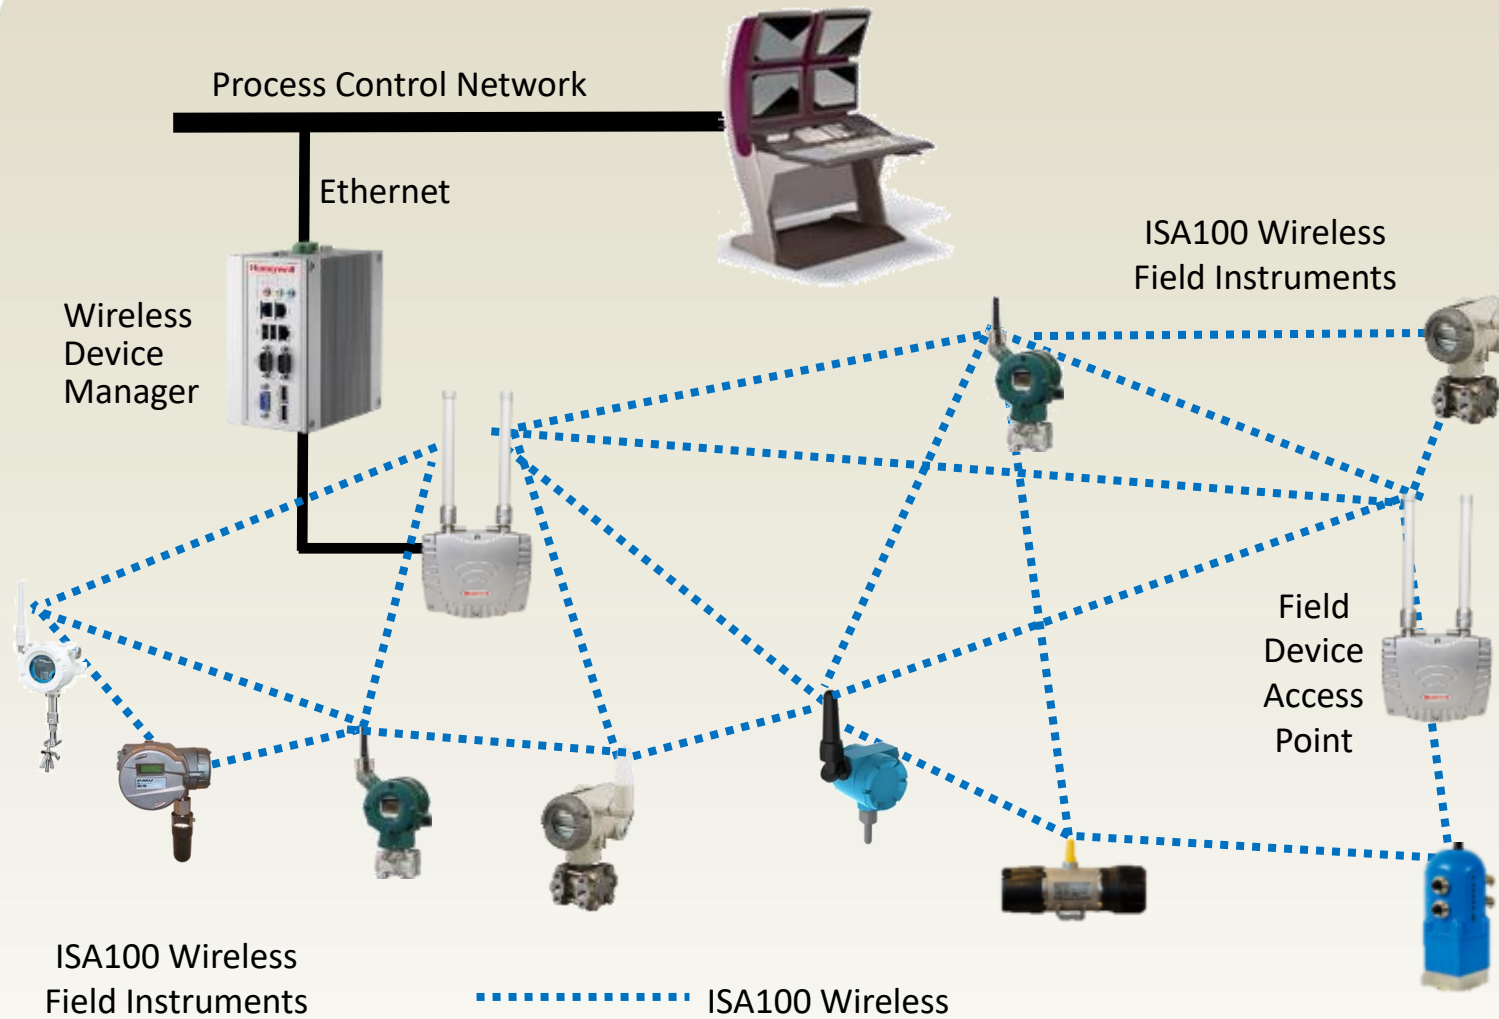

Agenda

1. Introduction Industrial Wireless
2. ISA100 Wireless Industry Standard
3. Safety in an historical perspective
4. Risk, Evolution and Compliance
5. Wired and Wireless
6. Summary
7. Q&A

Introduction to industrial Wireless

Applications examples

- Machine health monitoring
- Basic process control
- Monitoring of well heads
- Remote process monitoring
- Leak detection monitoring
- Diagnosis of field devices
- Condition monitoring of equipment
- Environmental monitoring
- Tank level monitoring
- Gas detection
- Fuel tank gauging
- Steam trap monitoring
- Open loop control
- Stranded data capture
- And more

ISA100 Wireless Fast Facts

- International standard IEC 62734 since 2014
- Complies with ETSI EN 300 320 v1.8.1 (LBT)
- Broad Multi-Vendor Portfolio of ISA100 Wireless Devices
- ISA100 Wireless enables SIL-2 Certification
- Ensured Interoperability - best-in-class solutions from best-in-class suppliers
- Readily available ISA100 Wireless Modules and Stacks
- Enable fast-track development and go to market

Benefits of ISA100 Wireless Instrumentation

Cost Savings	<ul style="list-style-type: none">• Up to 90% of installed cost of conventional measurement technology can be for cable conduit and related construction.• Typically: 1/5 the time, 1/2 the cost.• New and scaled applications are now economically feasible.
Improved Reliability	<ul style="list-style-type: none">• Wired sensors may be prone to failure in difficult environments.• Wireless can add redundancy to a wired solution.
Improved Visibility	<ul style="list-style-type: none">• Condition monitoring (equipment)• Process monitoring
Improved Control	<ul style="list-style-type: none">• Add wireless to existing processes for more optimal control.
Improved Safety	<ul style="list-style-type: none">• Safety related alarms

ISA100 Wireless Product Portfolio

Infrastructure

Independent Gateway
 • Honeywell, Yokogawa

Access Point (AP)
 • Honeywell, Yokogawa

Integrated Gateway/AP
 • Honeywell, Yokogawa, CDS, Nexcom

GW/AP + Recorder
 • Yokogawa

Adapter (HART, etc.)
 • Honeywell, Yokogawa

Measurement & Control

Temperature
 • Honeywell, Yokogawa

Pressure / Flow
 • Honeywell, Yokogawa

Level
 • Honeywell, Yokogawa

DI/DO, AI
 • Honeywell, Yokogawa

Valve Position
 • Eltav, Flowserve, Honeywell

HSE + Life cycle

Corrosion
 • RCS, Honeywell

Steam Trap
 Spirax Sarco, TLV, Armstrong, Bitherm

Vibration
 • GE, Divigraph

Gas
 • GasSecure, Scott Safety, New Cosmos, Riken Keiki

pH
 • Honeywell, Yokogawa

Agenda

1. About the speakers
2. Introduction Industrial Wireless
3. ISA100 Wireless Industry Standard
4. Safety in an historical perspective
5. Risk, Evolution and Compliance
6. Wired and Wireless
7. Summary
8. Q&A

Safety requirements and technology change over time

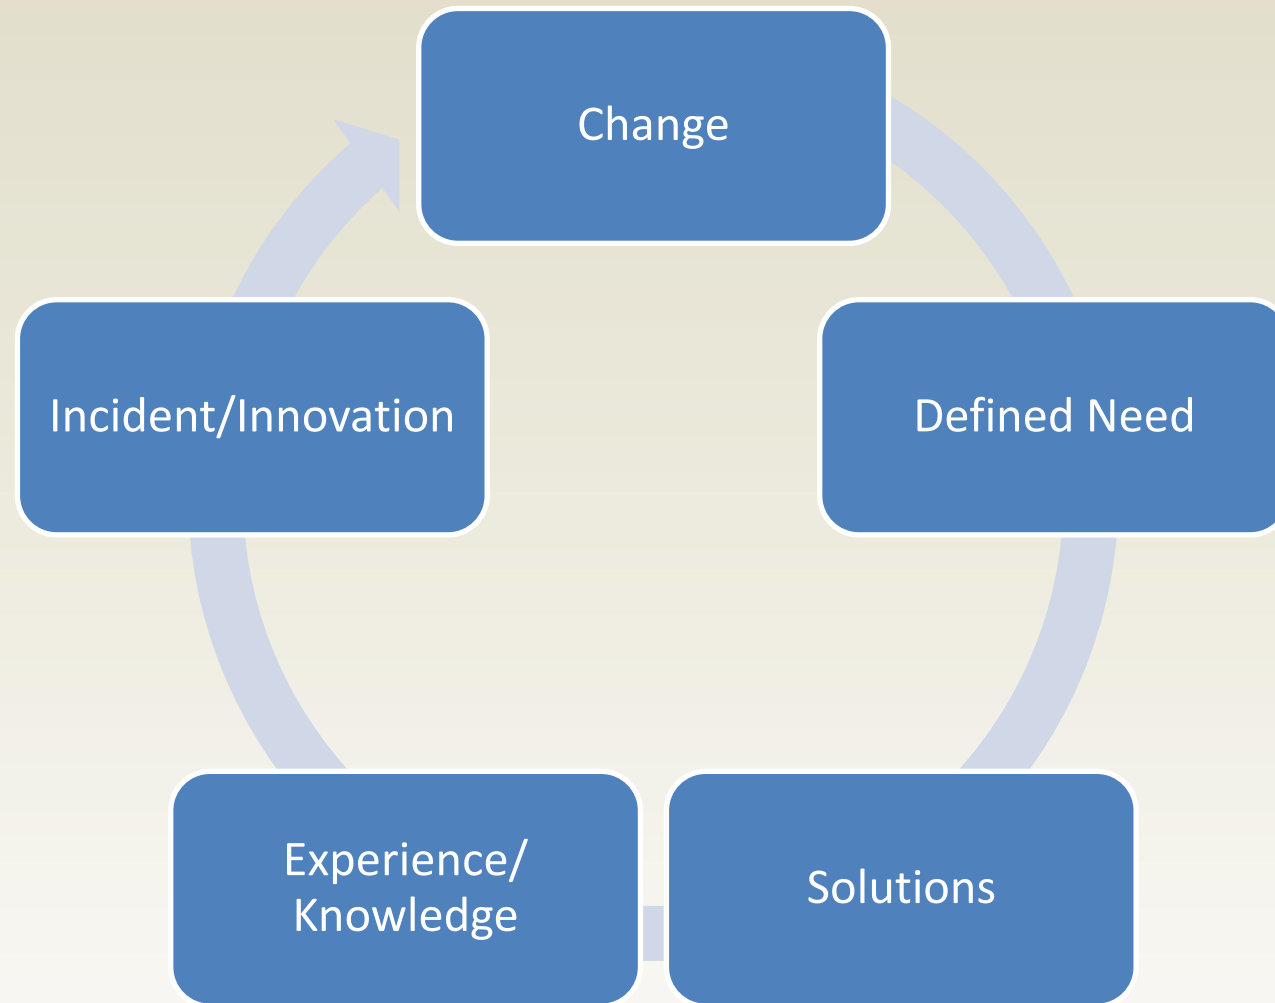

Agenda

1. About the speakers
2. Introduction Industrial Wireless
3. ISA100 Wireless Industry Standard
4. Safety in an historical perspective
5. Risk, Evolution and Compliance
6. Wired and Wireless
7. Summary
8. Q&A

Evolution of safety

Safety and compliance is a moving target

— Original Requirements — Today's Requirements

Agenda

1. About the speakers
2. Introduction Industrial Wireless
3. ISA100 Wireless Industry Standard
4. Safety in an historical perspective
5. Risk, Evolution and Compliance
6. **Wired and Wireless**
7. Case study
8. Summary
9. Q&A

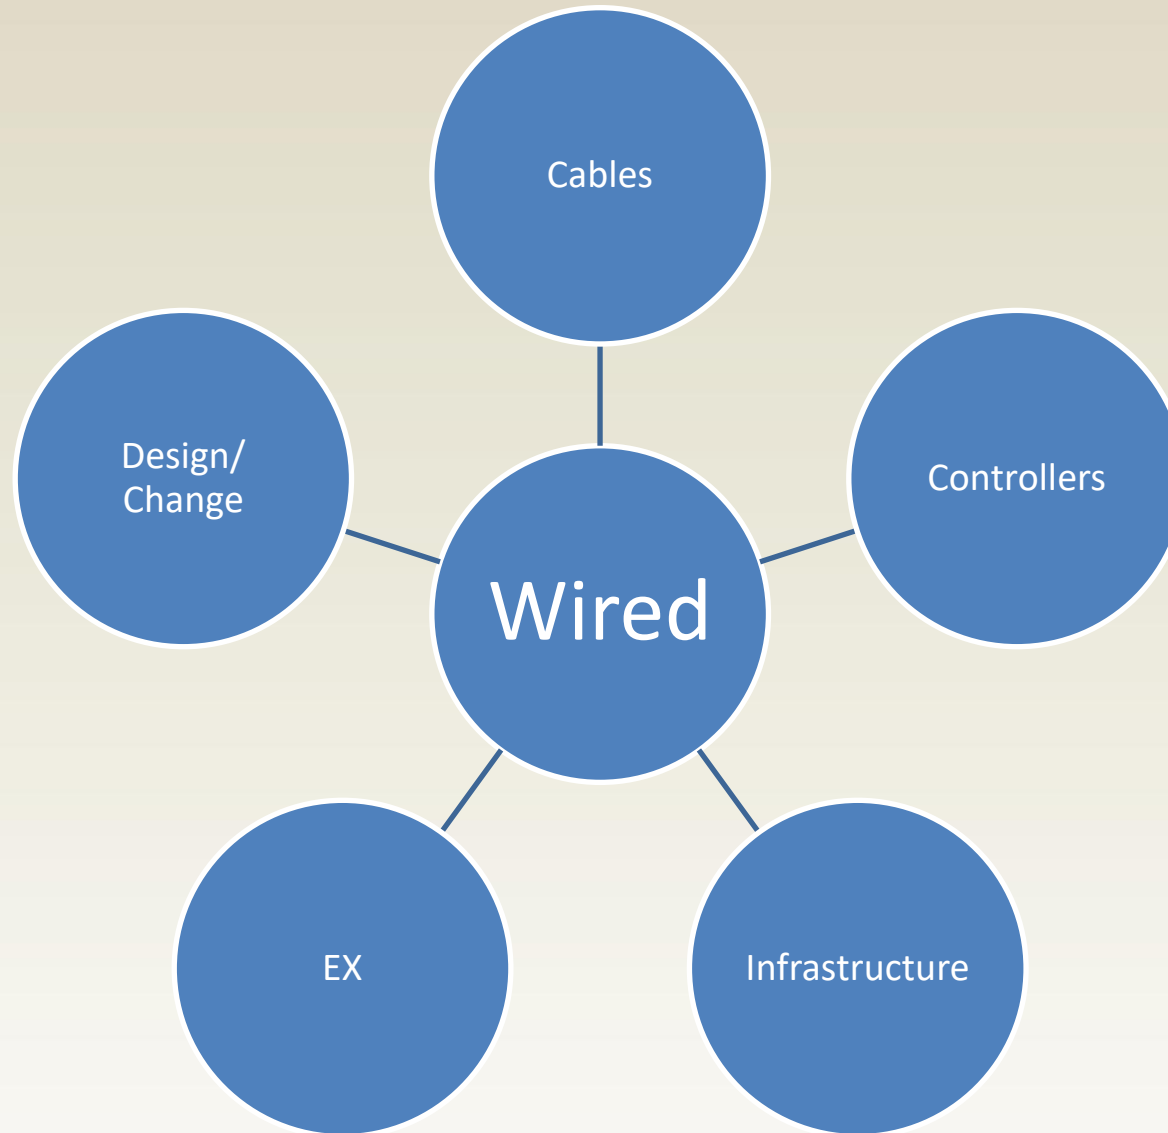

WIRED SYSTEM

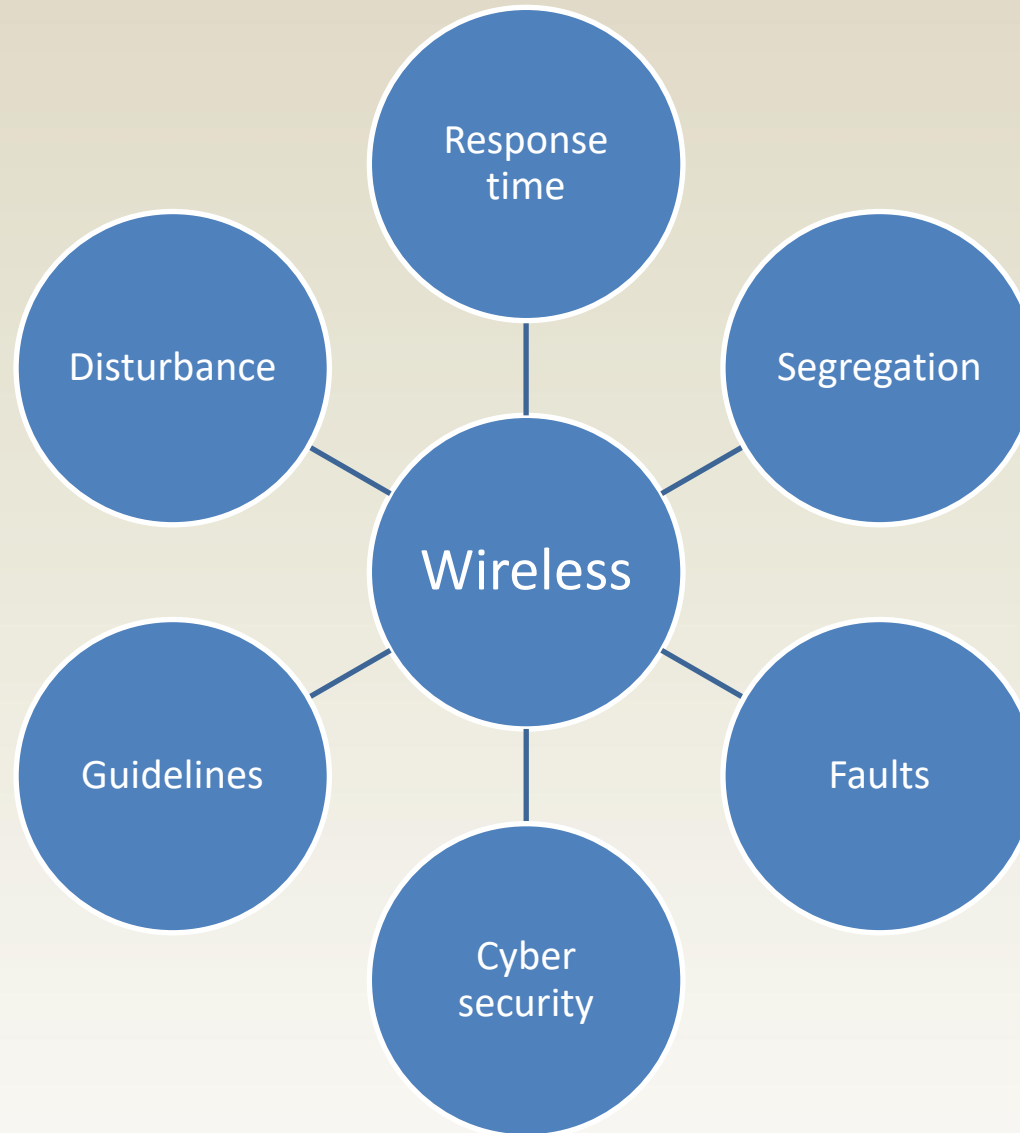

WIRELESS SYSTEM

Wireless gasdetection Applications

ExxonMobil FPSO Balder

- Project Details
 - - ExxonMobil Balder FPSO, Norwegian North Sea
 - - Upgrade of F & G system, to replace obsolete catalytic type detectors with IR
 - - Need to increase the number of detectors
 - - No spare cables for installation
 - - Full swivel stack on the turret
 - - Change in processes and temperatures from original design
- ExxonMobil decided to consider using the GasSecure GS01 wireless solution
 - - Initial trial approved in 2014
 - - 5 GS01 IR Point detectors, 2 Access Points and 2 Management Stations

Application ExxonMobil FPSO Balder – Trial / Phase 1

- 5 detectors installed in December 2014
- Redundant Management Stations and Access Points
- Integration to existing ABB 800xA control system

Application

ExxonMobil FPSO Balder – Trial / Phase 1

Client / Country	ExxonMobil / Norway
Project / Facility	FPSO Balder
Process / Plant / Application	FPSO Turret
Equipment / Infrastructure	5 GS01, 2 Access Points, 2 Management Station
SIL or Non-SIL	Non-SIL, with SIL 2 design for future upgrade
Services / Integration / Support	GasSecure and ABB
Executive Action	No
Main Challenges	Pipework / superstructure / offshore
Key Notes / Key Sales Points	Excellent wireless coverage

Application ExxonMobil FPSO Balder – Trial / Phase 1

Initial installation December 2014

Application ExxonMobil FPSO Balder – Trial / Phase 1

Management Stations and Access points

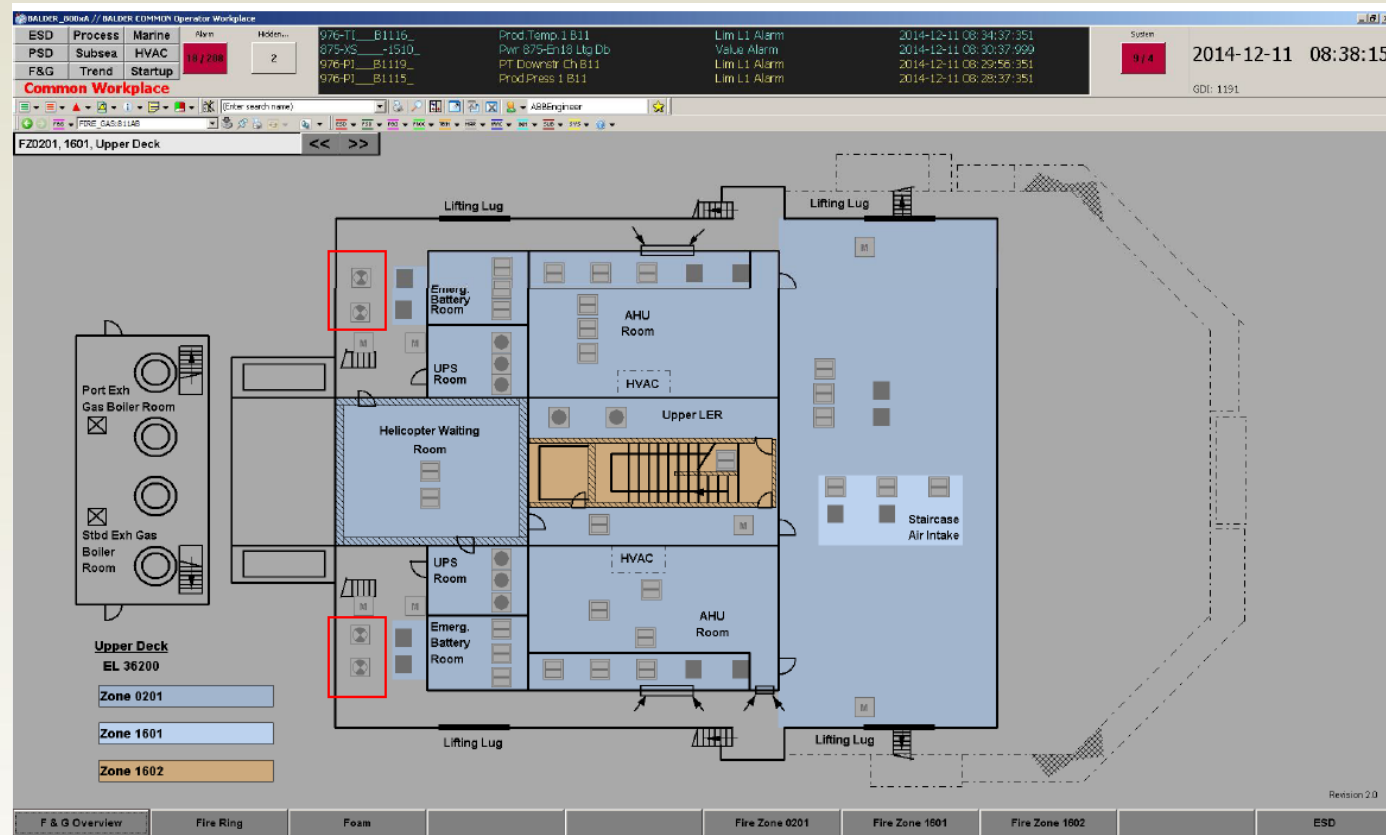

Application ExxonMobil FPSO Balder – Trial / Phase 1

GS01 detector placements

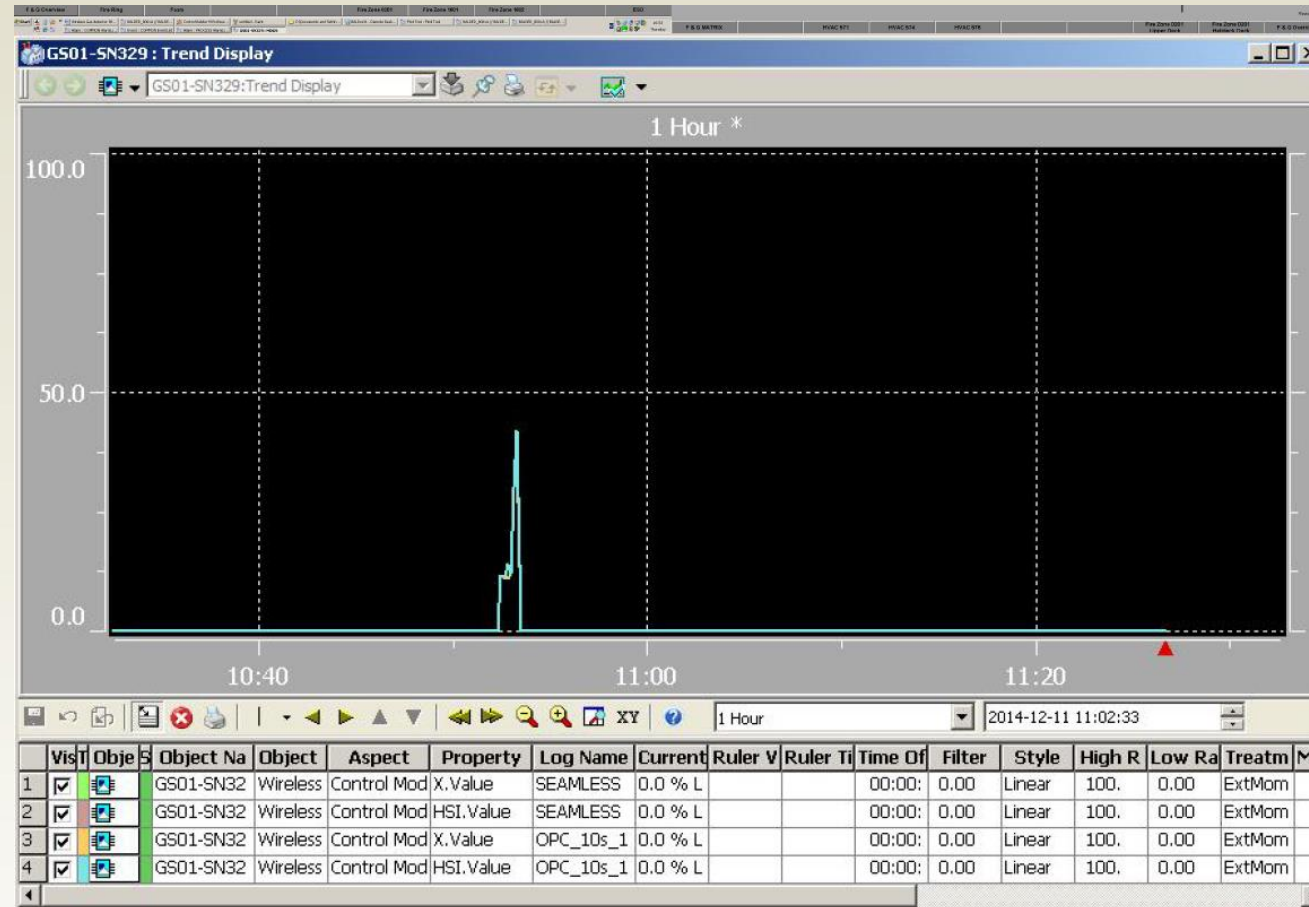

Application ExxonMobil FPSO Balder – Trial / Phase 1

Control room

Application ExxonMobil FPSO Balder – Trial / Phase 1

Bump test

Application
ExxonMobil FPSO Balder – Phase 2

Second installation April 2015

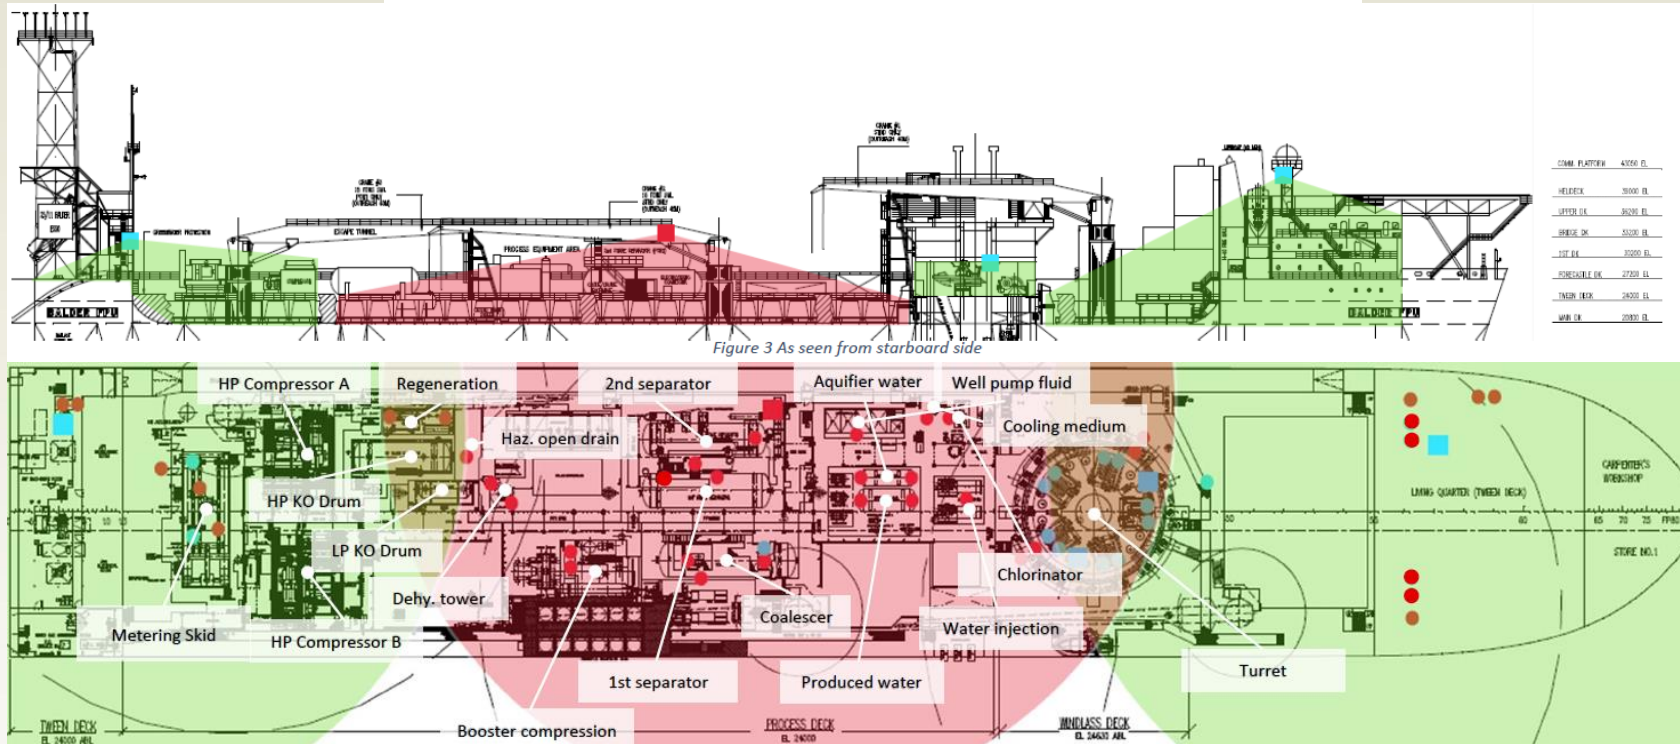

- After 5 month trial, ExxonMobil approved the GS01 solution
- 13 new GS01 detectors were installed in turret, replacing 13 catalytic detectors
- Installation carried out by ExxonMobil's own team on the asset
- Swivel stack was full on turret

Process / Plant / Application	FPSO Turret
Additional Equipment / Infrastructure	13 GS01, 2 Access Points, 0 Management Station
SIL or Non-SIL	Non-SIL, with SIL 2 design for future upgrade
Services / Integration / Support	GasSecure and ABB
Executive Action	No

Application ExxonMobil FPSO Balder – Phase 3

A full F & G mapping survey was undertaken in 2016

Application

ExxonMobil FPSO Balder – Phase 3

Client / Country	ExxonMobil / Norway
Project / Facility	FPSO Balder
Additional Equipment / Infrastructure	41 GS01, 4 Access Points, 0 Management Stations
SIL or Non-SIL	Non-SIL, with SIL 2 design for future upgrade
Services / Integration / Support	GasSecure and ABB
Executive Action	Yes. Shutdown of FPSO with zoned 2ooN, HH alarm at 30%LEL

Application ExxonMobil FPSO Balder – Phase 3

Third installation August 2016

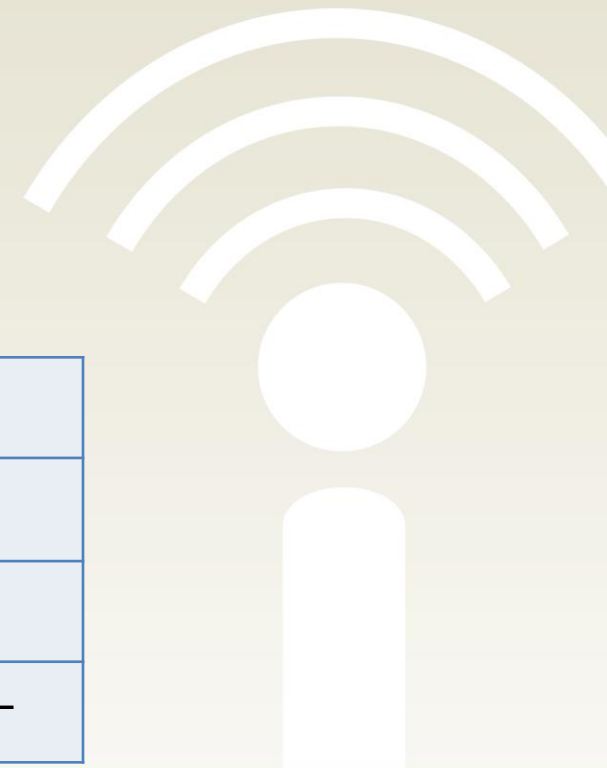

Application ExxonMobil FPSO Balder

Results from Balder

- System in operation now for almost 3 years
- Proven to be reliable and extremely cost effective
- Wireless technically approved by ExxonMobil for worldwide use
- Full executive action taken by the gas detection system
- ABB 800XA waiting to be upgraded to a SIL

Client / Country / Project	ExxonMobil / Norway / Balder FPSO
Final Equipment / Infrastructure	59 GS01 detectors, 8 Access Points, 2 Management Stations
SIL or Non-SIL	Pending, awaiting new ABB SIL control system
Executive Action	Yes. Shutdown of FPSO with zoned 2ooN, HH alarm at 30%LEL

Wrap-up

1. Introduction Industrial Wireless
2. ISA100 Wireless Industry Standard
3. Technology for wireless gas detection
4. System Architecture
5. SIL Certification and Safety Function
6. SafeWireless and PROFIsafe
7. Fault Tolerant Wireless Network
8. Case Study
9. Summary

Online Resources

www.isa100wci.org

- Learning Center with White Papers
- Articles, End-user stories, Forum
- Receiving over 20,000 web views per month
- Full list of certified/registered ISA100 Wireless devices
- And more useful content for you and your business

LinkedIn [ISA100 Wireless Interest Group](#)

- Latest news, end-user and expert discussions, insights
- 900 members and growing; please join and invite your peers to join as well !
- Receiving over 5,000 web views per month
- **Limited Time Offer: Join the group and you will be entered in a prize draw to win a new iPad**

ISA100 Wireless Adoption Development Eco-system

WCI ISA100 Wireless Rapid Development Kit

- Everything you need to develop an ISA100 Wireless (IEC 62734) connected field instrument
- Develop ISA100 Wireless (IEC 62734) compliant and certifiable field instruments with minimal effort using application layer code provided
- Includes reference hardware design for ISA100 Wireless (IEC 62734) field instrument implementation
- Certified WISA modules run ISA100 Wireless communication stack
- User friendly SPiN development board includes OLED display and a large variety of sensors
