numbers are not
available at this time**

ISA100 Wireless Fast Facts

- International standard IEC 62734 since 2014
- Complies with ETSI EN 300 320 v1.8.1 (LBT)
- ISA100 Wireless Device Portfolio exceeds 44 devices
- Certified ISA100 Wireless Devices exceeds 25 devices
- April 2015 GasSecure GS-01 gas detector achieves a world first with SIL-2 Certification in Wireless Gas Detection
- Focus on Certification to Ensure Interoperability and best-in-class solutions
- Availability of ISA100 Wireless Modules / Stacks (see contact details on www.isa100wci.org)

1. Nivis
2. Murata
3. Yokogawa
4. Honeywell

ISA100 Devices Added Jan – Sept 2015

	Device Type / Manufacturer	Certified
1	Yokogawa Stack	Yes
2	Yokogawa Adapter	Yes
3	Yokogawa Adapter	Yes
4	TLV Steam Trap	Yes
5	TLV Steam Trap	Yes
6	Armstrong Steam Trap	Yes
7	Spirax-Sarco Steam Trap	Yes
8	Cosasco Corrosion Sensor	Yes
9	Scott Safety Gas Detector	Q4 2015
10	Flowserve Valve Positioner	Q4 2015
11	SKF Vibration Sensor	Q4 2015
12	CDS Vibration Sensor	Q4 2015
13	Murata Comm. Module	Q4 2015
14	Bitherm Steam Trap Monitor	Q4 2015
15	Nexcom ISA100 to WIFI bridge	

Visit the ISA100 Wireless Website

- ISA100 Wireless Whitepaper available for download from website authored by Jay Werb, Technical Director
- News and details about the ISA100 Wireless Demo at the June 2015 Achema exposition in Frankfurt
 - 3 live networks with 36 devices from 17 vendors
- Full list of certified/registered ISA100 Wireless devices
- Use cases and customer stories
- ISA100 WCI website receiving over 20,000 web views per month

Developing an ISA100 Wireless Certified Product

Webinar Overview

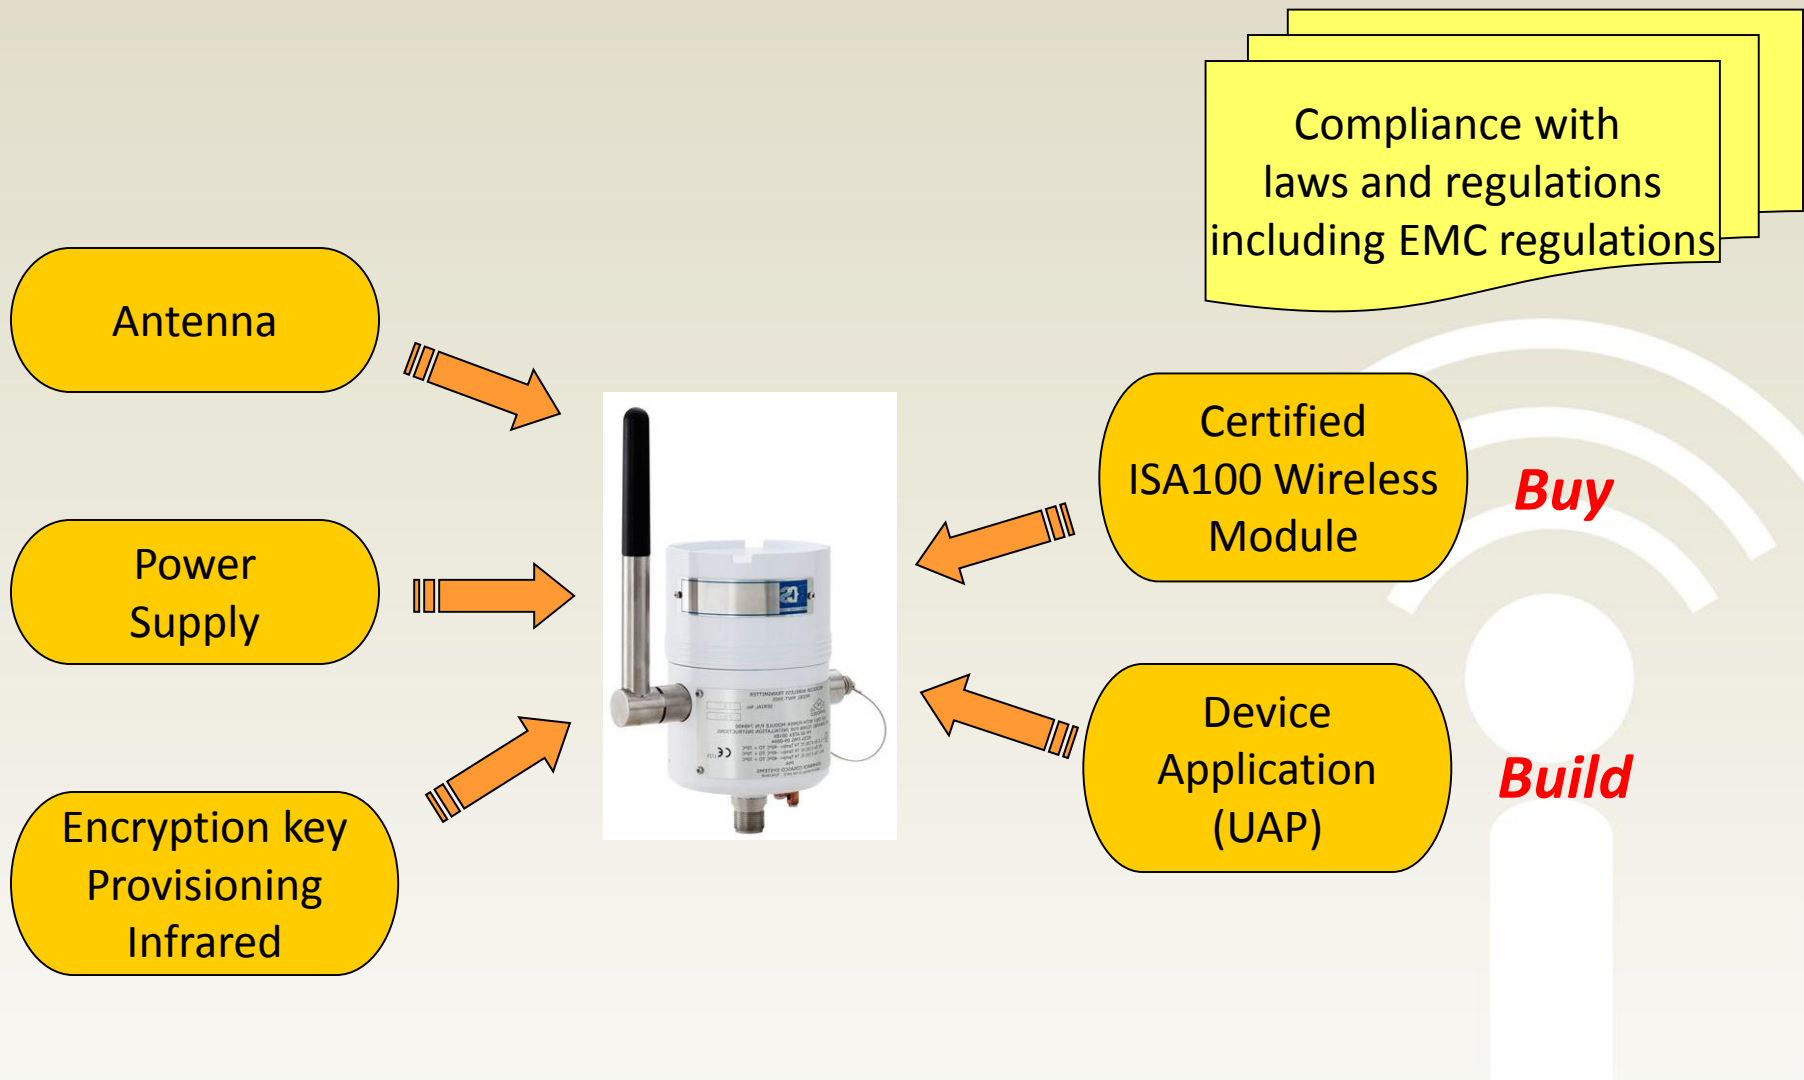

- Development Process
- Available Technologies
 - *Case Study from Murata*
- WCI Certification
- WCI Marketing Programs
- Q & A

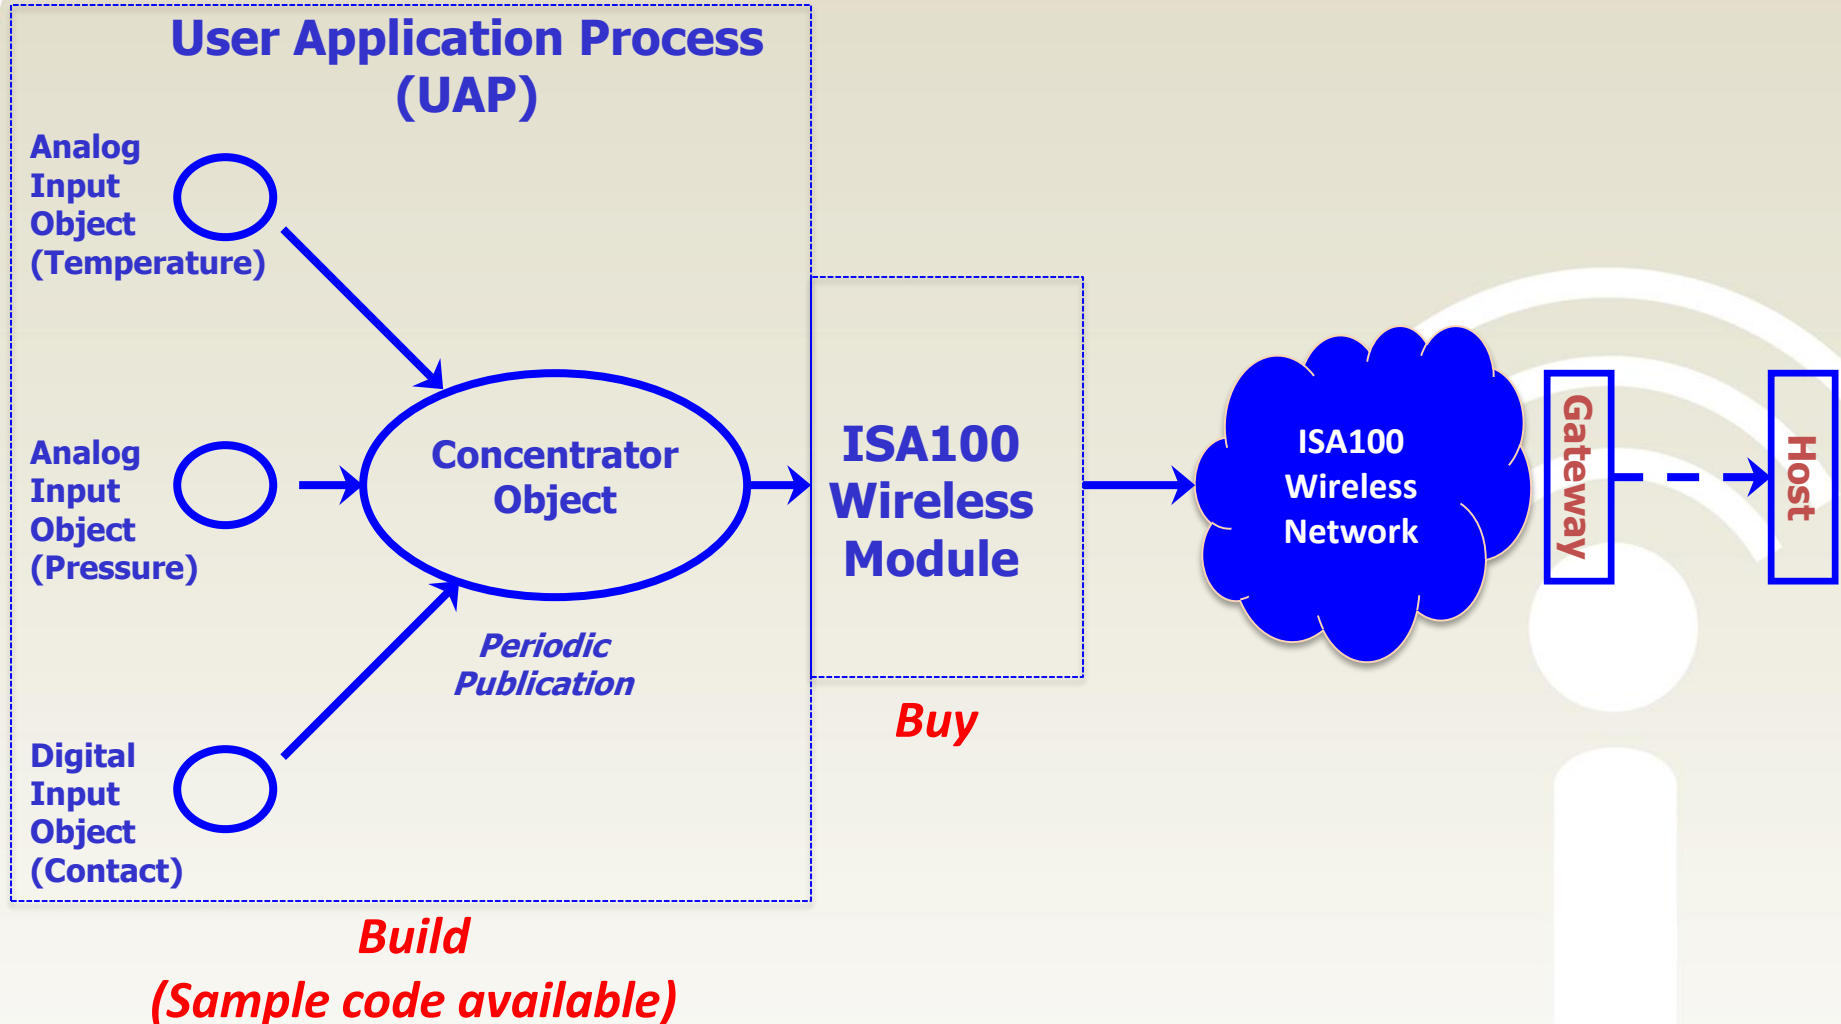

Development Process

Typical Field Device Technologies

ISA100 Wireless User Application Process (UAP) Publication

ISA100 Wireless Stack Technologies

Source	Description
Nivis (CDS, Centero)	Certified in 2010. Modules used in many ISA100 Wireless devices.
Honeywell	Certified in 2010. Reference design used in Honeywell products.
Yokogawa	Certified in 2015. Integrated stack and antenna.
Murata	New. Module developed in collaboration with Yokogawa.
Open Source	Uncertified version of Nivis stack, intended for R&D, 2013.
Others	At least 3 additional stacks are under development.

Murata case study follows on next 11 slides.

Introduction Murata ISA100 Wireless module

Presented by: Ryuhei Nakai

Oct 21, 2015

About Murata

Our Business

We are worldwide leaders in the design, manufacture and supply of electronic components and solutions.

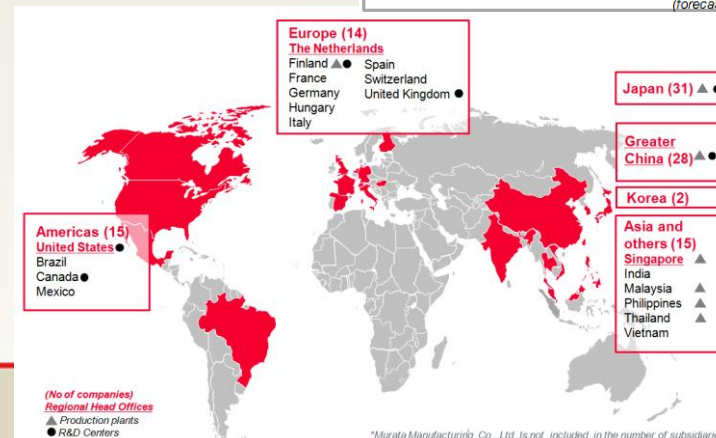

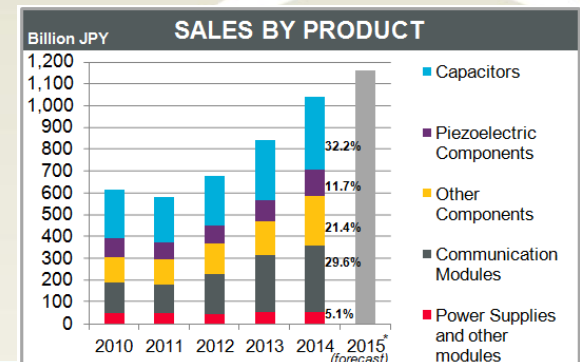

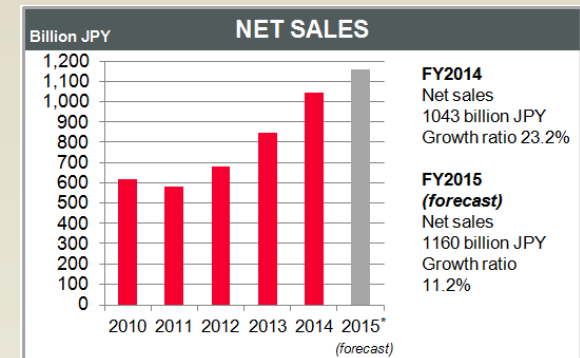

We are Innovators in Electronics.

Our Strengths

- Advanced materials technology and expertise
- Broad product portfolio
- Extensive global manufacturing and sales network

Our Figures

- Net sales 1,043,542 million JPY*
- Employees 51,794*
- Number of subsidiaries 105*
(31 in Japan, 74 overseas)
- Established in 1944

Murata wireless modules Coverage for IoT

Murata-Yokogawa Alliance for development of ISA100 Wireless module

Murata has a solid record in developing wireless communication modules.

Yokogawa has developed a number of leading-edge technologies for use with ISA100 Wireless devices and systems.

Murata and Yokogawa have reached an agreement whereby they will cooperate in the development of communication modules for field wireless devices used in plants.

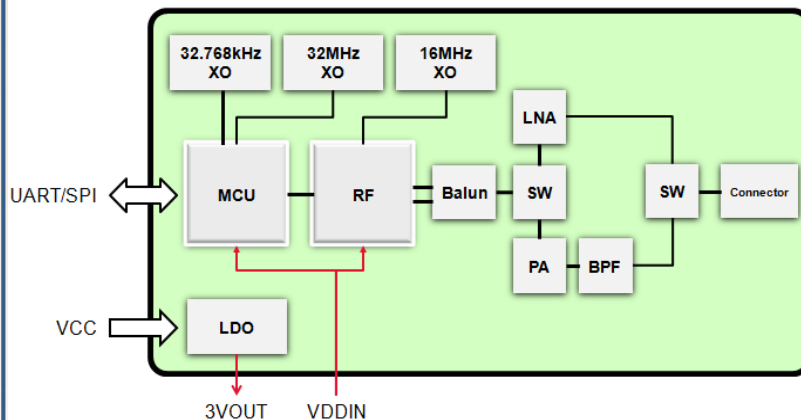

Overview of ISA100 wireless module

The LBBA0ZZ1EU is a 2.4GHz wireless module featuring a highly-integrated and low power radio design. All components relating to wireless function are integrated into this module. This module has “ISA stack” software to support ISA100 Wireless. The ISA stack includes MAC, Data Link, Network, Transport, Application sub-layer and DMAP.

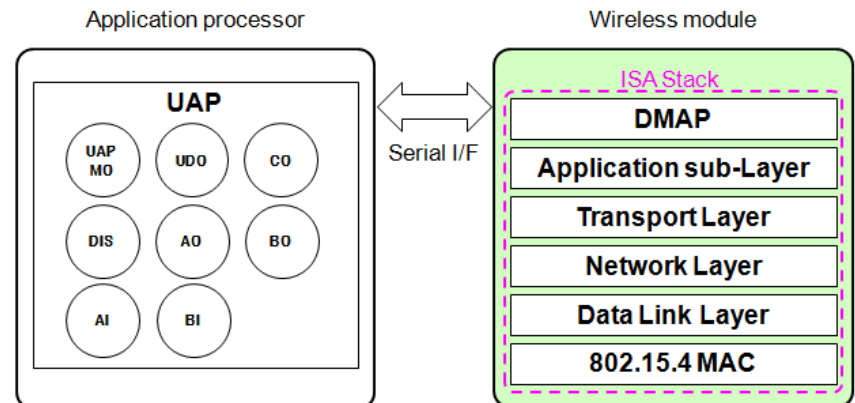

Appearance

HW Block Diagram

SW Block Diagram

The LBBA0ZZ1EU support customers who develop ISA100 Wireless products regarding minimization of the design cost and development period.

Spec of ISA100 wireless module

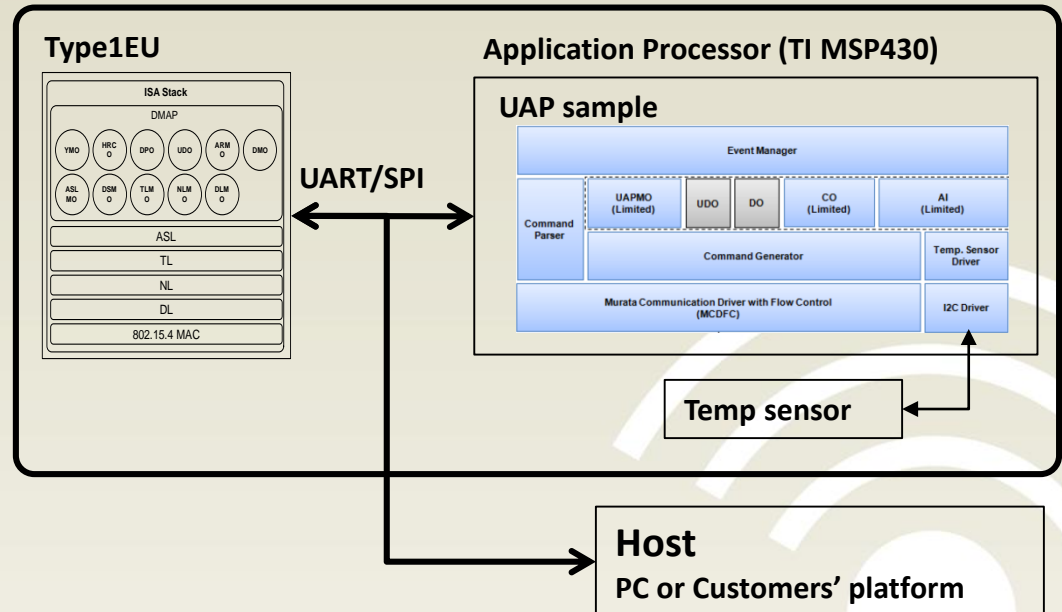

Module Length (Typical)	31.0 mm
Module Width (Typical)	21.0 mm
Module Height (Max)	6.1 mm
Package	LGA
Pad size (Typical)	1.4 x 1.6 mm
Number of pad	60
Mounting Type	SMT (Surface mount technology)
Antenna	External
System Clock	Internal (32MHz)
MSL	Level3
Protocol	ISA100 Wireless (W2-00)
Operating Temperature	-40degC ~ +85degC
Supply Voltage with Internal LDO	3.2V ~ 5.5V
Supply Voltage without Internal LDO	2.4V ~ 3.0V
Transmit power	+10dBm Max
Receiver Sensitivity at 10% PER	-98.5dBm Typical
Transmit Mode Current	40mA Typical
Receive Mode Current	18.5mA Typical
Sleep Mode Current	10uA Typical
Host Interface	UART or SPI
RoHS Compliant	Yes

Evaluation tool

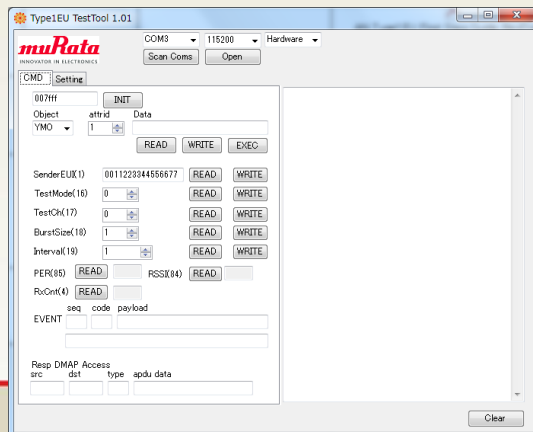

Evaluation board

Outline of Evaluation board

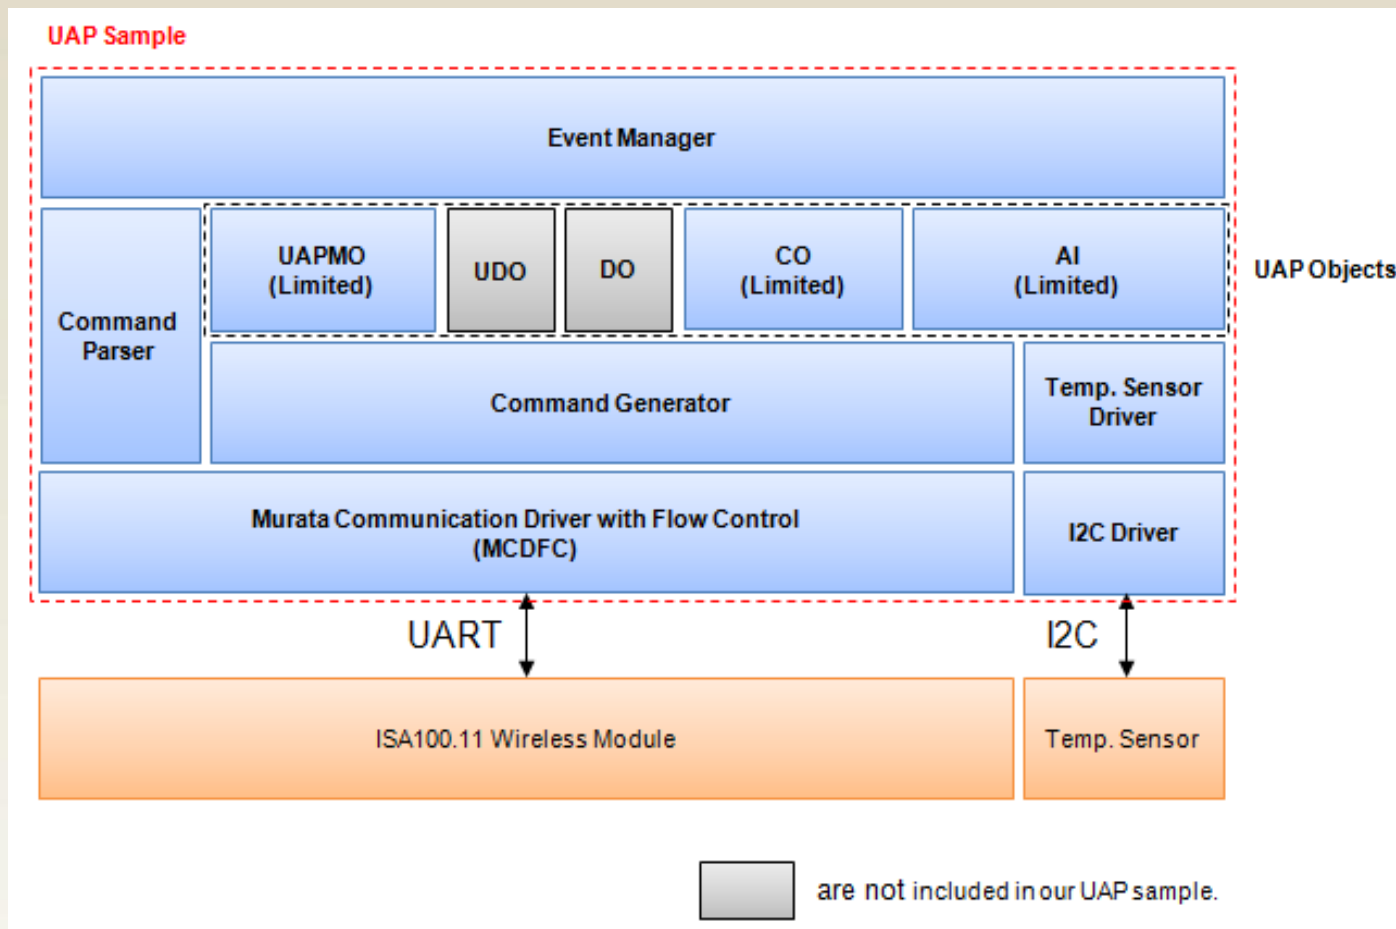

RF test tool

Usage of Evaluation board

- ① Operate Type1EU from external Host via serial interface.
- ② Check the functionality of Type1EU by utilizing “UAP sample” on Application Processor in Evaluation Board.

User Application Process (UAP) Sample

UAP sample is designed to work without Operating System. Therefore, processing is executed by a single thread.

ISA100.11a Development Kit

- Allows customers to evaluate the performance of a ISA100.11a wireless network
- The kit is designed to allow customers to swiftly integrate Centero's ISA100.11a OEM components into their product line

Field Tool

- Handheld tool, allows customers to provision and configure field instruments installed in industrial settings
- Supports OTA and infrared based provisioning

ISA100.11a 'Enterprise' Source Code

- Source code for all ISA100.11a network components, including the certified ISA100.11a field device stack, Backbone Router, Gateway and System Manager
- Allows vendors to customize their implementation and build royalty free products

ISA100.11a VersaAPP Software Development Kit

- Complete ISA100.11a development kit that speeds development of wireless industrial field instruments
- Application layer code available as a library or source code

Yokogawa antenna

*Slide provided
by Yokogawa*

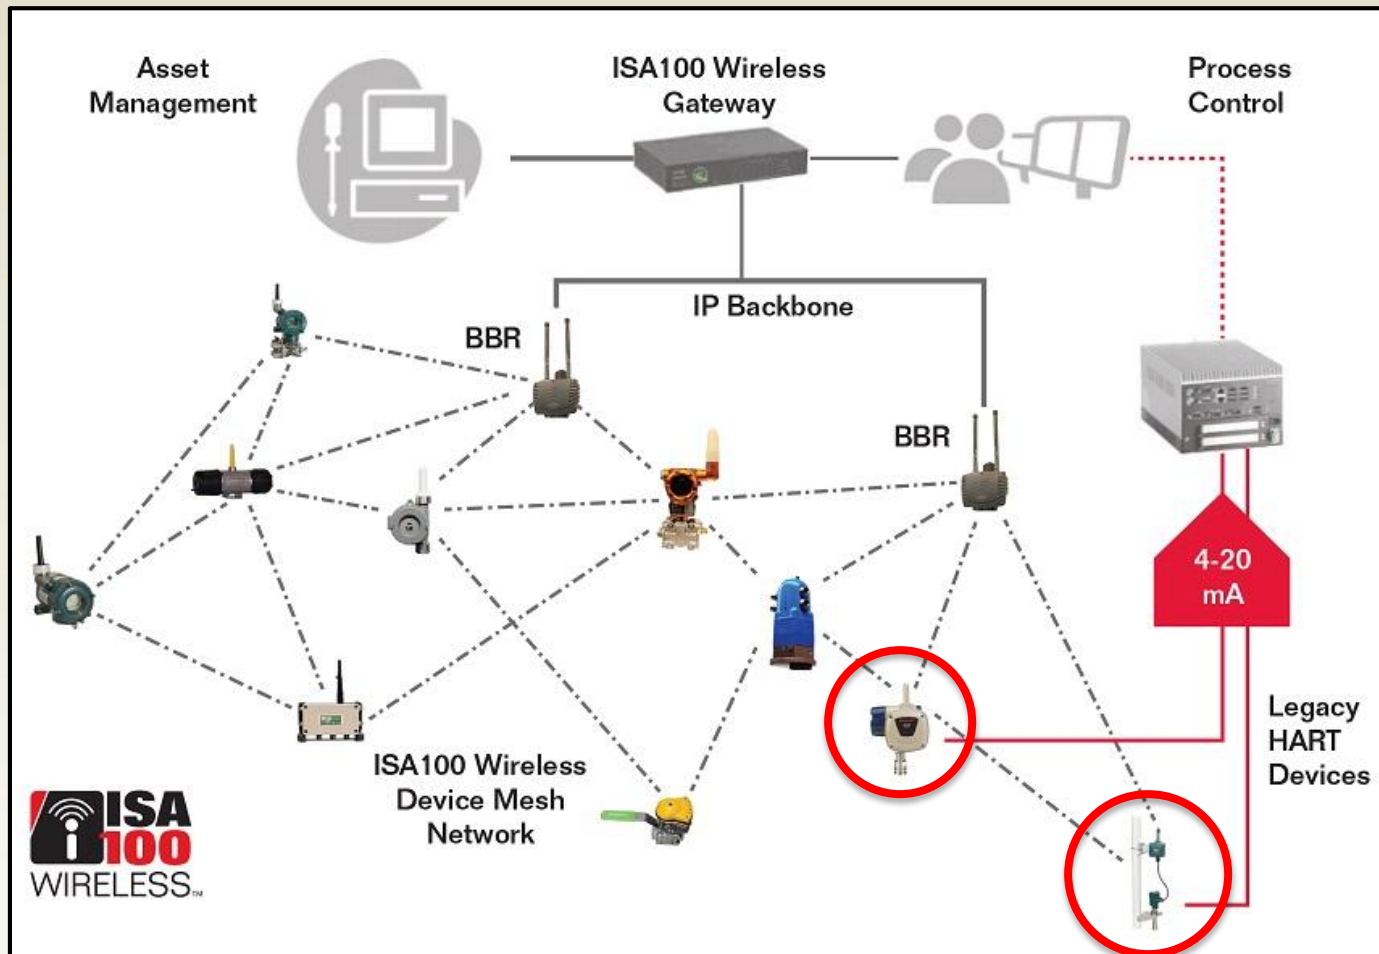

Yokogawa antenna module simplifies wireless sensor development.

- RF circuit and ISA100 stack are implemented.
- The antenna module will be certified for the major radio laws
 - FCC, RT&T and Giteki
- The antenna module designed to comply with intrinsic safety.
- Sensor makers can focus on sensor development.
- Accelerates development of wireless sensor
- Reduces development time

Certification

67 T.W. Alexander Drive
P.O. Box 12277
Research Triangle Park, NC 27709

CERTIFICATE OF CONFORMANCE

Manufacturer: Rohrbach Cosasco Systems, Inc.

Model Number: MWT-3905

Name/Description: Microcor Wireless Corrosion Transmitter

Stack Version: V3_04.11.02

Hardware Revision: A

Application Firmware: V02.09

Test Kit Version: DTK 1.14

Certification Type: Device

Test Profiles: Analog Input / Analog Output / Application Firmware Download

Test Lab/Site: ISA100 Wireless Compliance Institute

Test Date: 9/10/2015

Registration Date: 9/15/2015

Registration Listing: www.isa100WCI.org

Valve Positioner	

Wireless Compliance Institute Validation Strategy

Certification Testing

- ✓ One device at a time
- ✓ One supplier at a time
- ✓ One emulated (XML) system manager
- ✓ One emulated (XML) gateway
- ✓ Comprehensive test

Validates the device

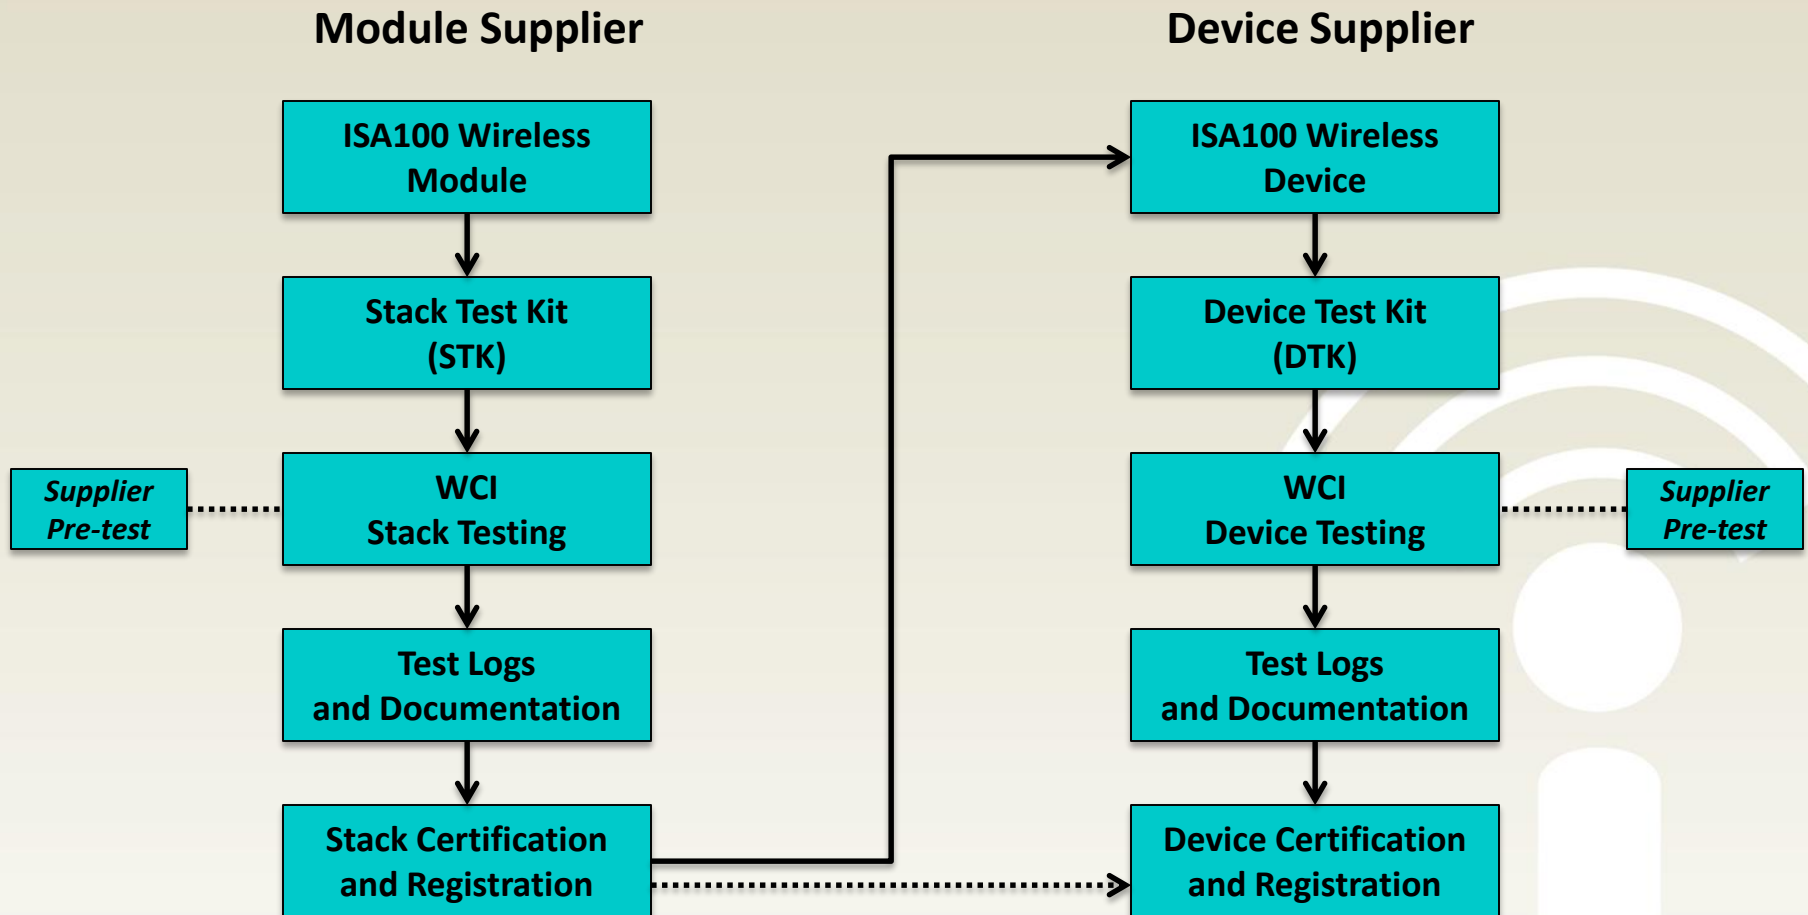

Live Network Interoperability Test

- ✓ Multiple devices in a network
- ✓ Multiple suppliers in a network
- ✓ Multiple system managers
- ✓ Multiple gateways
- ✓ Compatibility trial

Validates the certification

The two approaches, together, ensure interoperability.
