ISASecure®

Trusted IEC 62443 Certifications

ISASecure® is the global industry initiative to secure control systems

As a participant in the ISASecure program, you are working with thought leaders who are taking action to improve our world. The program promotes secure and robust technology in systems that affect the every-day life of our families, communities, and global neighbors.

Using international standards as a foundation, the ISASecure program's core mission is to provide trusted and independent cybersecurity certifications for control systems, as well as automation and IOT technology.

Product assessments and certificates of conformance are completed by ISO/IEC 17065 accredited certification bodies from all over the globe, with offices located in Germany, USA, Japan, and other geographies. The program has been active for over 10 years, with the first certificate of conformance issued in early 2011.

The certification scheme is based upon the international IEC 62443 standards developed by subject matter experts from many industries around the globe. The ISASecure scheme has been well-vetted by end-users, certification bodies, and control system suppliers from many industry sectors, including the process and building controls industries.

There are many ways to participate...

Are you seeking marketplace recognition for your company's cybersecurity initiatives at a great price?

Adopter/supporter members receive discounts on ISASecure certification fees and gain marketplace recognition through ISASecure marketing activities, such as webinars, live events, press releases, and website listings.

Are ISASecure certifications an important part of your company's competitive product offerings?

Technical members draft and vote to approve ISASecure certification specifications. Your company will directly influence the certification program.

Does your company desire to take a leadership role in the ISASecure initiative?

Strategic members establish the strategy and direction of the ISASecure certification program. Your company will have a vote on the ISCI governing board.

As an industry group, government organization, or individual, does the ISASecure certification program support your interests in securing control systems?

Associate/government members can contribute to ISASecure certification specifications through review and comment on technical committee work products. Your participation will publicly demonstrate your constituents' support for this important industry initiative.

ISASecure® member

Membership Levels and Benefits

Adopter/ Supporter Members

✓ 40% discount on product certification registration fees

✓ Company name and logo listing on the ISASecure website and marketing materials

✓ Permission to use the ISASecure member designation on marketing materials and website

✓ Links to/from member website

✓ Joint marketing opportunities at trade shows and ISASecure sponsored webinars

✓ Internal updates and newsletters

Strategic Members

✓ ***ALL** The Adopter/Supporter Member and Technical Member Benefits **PLUS***:

✓ ISCI Governing Board participation rights

✓ Right to **vote** on program policies and procedures

✓ Right to **vote** on program strategy and budget

✓ Right to **vote** on new certifications and program specifications, and to **vote** on certification updates

Technical Members

✓ ***ALL** The Adopter/Supporter Member Benefits **PLUS***:

✓ Technical Steering Committee (TSC) participation rights

✓ Right to **vote** on TSC specification documents

✓ Right to contribute, review and comment on technical certification specifications in TSC forums

✓ Right to contribute, review and comment on program specifications such as test tools, lab accreditation requirements, auditor requirements in TSC forums

Associate/ Government Members

✓ Right to review and comment on technical specifications distributed by TSC

✓ Right to review and comment on program specifications such as test tools, lab accreditation requirements, and auditor requirements distributed by TSC

✓ Company name and logo listing on the ISASecure website and marketing materials

✓ Permission to use the ISASecure member designation on marketing materials and website

✓ Links to/from member website

✓ Joint marketing opportunities at trade shows and ISASecure sponsored webinars

✓ Receive internal updates and newsletters

From all corners of the industry

"ISASecure solves a very specific marketplace problem. The ISA99 standards committee was an open consensus forum where end-users were able to have a voice in establishing cybersecurity standards for operational technology. The ISASecure Program is the platform through which end-users can ensure the ISA/IEC 62443 standards are implemented in the real world as envisioned during the standards development process."

Kenny Mesker
Chevron
Tech Expert PCN/SCADA
Cybersecurity

Directly Influence Industry

"Product compliance is a key aspect of Schneider's cybersecurity strategy. Membership in ISASecure provides Schneider a voice in the development of the ISASecure certification specifications along with discounts on certification fees."

Daniel Desruisseaux
Schneider Electric
Director, Cybersecurity
Program Industry Business

Relationships with Industry Partners

"The ISASecure certification scheme is a valuable part of exida's certification offerings. It clearly has benefited from its diversity of members that include asset owners, suppliers, and certification bodies. We have been able to provide strong input to the scheme."

Dr. William Goble
exida
Principle Partner/Managing Director

Ultimately, cybersecurity is a shared responsibility among the end-user, the system integrator, and the system supplier

Membership Fees

Up to date membership fees are listed on the membership application.
